# 3D-6D

Russian Volume Eyelash Extensions are the new trend in the eyelash industry. They started in Russian in 2010. They have spread across the globe as many people desire full, luminous lashes instead of just long eyelashes. Volume Lashes consist of applying multiple lash extensions to each natural eyelash in a fanned shape. This can result in having 200- 500 eyelash extensions applied to each eye, rather than the regular 80-100 extensions per eye with the classic 1:1 eyelash extensions. The extensions used are even lighter, and finer than classic Eyelash extensions.
